
items are hidden by other module

Posted by maorlast - 2010/11/02 21:02

I added a images module to my site, unfortunately the menu items are transparent and as a result being hidden by the image module.

Can this be fixed?

Thanks!

We can't get access to your site because it requires credentials. You can send it by email.

This problem with site template styles. Add the following CSS rules:

```
#content
{
    position: relative;
    z-index: 1;
}
```

```
#header
{
    position: relative;
    z-index: 2;
}
```

This is unbelievable.
What a great support you give

Thanks!

Similar problem here: www.kulturosupa.gr

The child menu items are shown behind parent, cause of 2 line menu. I changed, probably not the correct one, z-index in menu.min.css, with no results.

Thanks in advance

Hello,

It doesn't work because main menu items are placed into 2 lines. The module works correctly when menu items are place into 1 line.

Solved by breaking the menu to 3 indepentent mods, in 3 different positions with the correct z-index in each of them.

Thanks!!!
