
Problems with menu width and other formatting

Posted by elena21 - 2010/11/03 12:56

Thanks again for great menu and outstanding support.

I have a few problems.

http://www.visimaker.com/joomla/index.php?option=com_content&view=article&id=13&Itemid=14

1. When click on submenu for a second I get all menus reformatted. I attached a sample.
I made some customization to menu.min.css file looking to other examples that you have on this forum.

```
BODY .ux-menu A{ background:url(images/blue_bg.png); color:#FFF;}
BODY .ux-menu A:focus,
BODY .ux-menu A:hover,
BODY .ux-menu A.ux-menu-link-hover
BODY .ux-menu A.current
{
    background:url(images/blue_sel_bg.png);
    color:#eae9fd;
}
```

```
UL.ux-menu LI UL.ux-menu-sub LI A
{
    background: #f7f7f7;
    color:#036;
}
```

```
UL.ux-menu LI UL.ux-menu-sub LI A.ux-menu-link-hover,
UL.ux-menu LI UL.ux-menu-sub LI A:hover,
UL.ux-menu LI UL.ux-menu-sub LI A:focus
{
    background: #b6c9e2;
    color:#036;
}
```

2. I want to have a horizontal menu pattern all across the page (width 960 px). What should I change?
3. Horizontal menu submenus are behind the vertical menu module.
4. For vertical menu module, how to set up width of vertical menus to 200 px?

Thank you

Hello,

1. Try to set "Load method" parameter to "On Load".
2. You can specify background of menu container with help the following CSS rule:

```
#tabarea .ux-menu-container
{
    background: red;
}
```

3. Use the following CSS rule:

```
#tabarea .ux-menu-container
{
  z-index: 11000 !important;
}
```

4. Type the following code in "CSS Styles" parameter in module settings:

```
#{ $id },
#{ $id } li.ux-menu-item-main
{
  width: 200px !important;
}
```

Regards,
ARI Soft
