Beginner question Posted by amago95 - 2010/11/04 21:43
Hello,
I just installed the module and I already got the content to be viewed on the page. However I must work on the format, I want my menu to look just like the menu on the official demo web site.(http://www.demo2.ari-soft.com/ari-ext-menu.html)
My page is www.bodybuildingperu.com and you will see that:
 the colors are different the sub-menus are different size the arrows are not in the correct place.
As I said, I want the menu to look as the official demo page. What do I have to add on the CSS parameter please?
Thanks so much!
Re:Beginner question Posted by admin - 2010/11/05 06:03
Hello,
Open site template index.php file, find the following code:
and replace it with:
Regards, ARI Soft
Re:Beginner question Posted by amago95 - 2010/11/05 16:34
Hello,
Thank you so much! That worked pretty well!
Please can you let me know how can I reduce the height of the menus? Is it possible to establish one height for the main menus and another one for the submenus?
Thanks!
Re:Beginner question Posted by admin - 2010/11/05 16:48
Try to use the following CSS rules:

Iline-height: 10px; } Regards, ARI Soft	
#pillmenu1 .ux-menu-container .ux-menu A A { line-height: 10px; } Regards, ARI Soft	#pillmenu1 .ux-menu-container .ux-menu A
#pillmenu1 .ux-menu-container .ux-menu A A { line-height: 10px; } Regards, ARI Soft	t line-height: 8px;
Iline-height: 10px; } Regards, ARI Soft	}
Iline-height: 10px; } Regards, ARI Soft	#pillmenu1 .ux-menu-container .ux-menu A A
Regards, ARI Soft	
Re:Beginner question Posted by amago95 - 2010/11/07 00:42 Hello, Thanks for the answer. Eventhough I am reducing the height, all the lines in the submenu are not apearing on the screen as there are many lines. So, is there a way to show the submenus in more than one column? Thanks. Re:Beginner question Posted by admin - 2010/11/07 08:54 No, the module doesn't provide this ability. Regards,	line-neight: 10px;
