
How to align the text to the vertically center

Posted by maorlast - 2010/11/09 05:14

Hi there,

how can align my text vertically to the center? (currently it's a bit upper than the middle)

another question if i may:

I set the title to be bold is there an option to set only the menu to bold without the submenus?

Thanks!

Hello,

Use the following CSS rules:

```
#top_menu .yui-skin-sam div.bd ul li A.yuimenuBarItemLabel
{
    padding-top: 8px;
}
```

```
#top_menu .yui-skin-sam div.bd ul li div.bd ul li A.yuimenuItemLabel
{
    padding-top: 9px !important;
    font-weight: normal !important;
}
```

Regards,
ARI Soft

Thank you, however after applying the changes, when the text gotten below to the middle as I wanted, I now see that the Hover is too big for the main items

This happens only on IE7

Can this be fixed?
