XHTML-Validation Error

_____

Hi there,

i just used the wonderful module of the ARI Ext Menu for the second time. But the new version seems to be xhtml-invalid, because of the messages:
- document type does not allow element "link" here
and
- document type does not allow element "style" here

Here is the link to the validation errors: http://validator.w3.org/check?verbose=1&uri=http%3A%2F%2Fwww.compass-bueren.de%2Fcms%2Findex.php%3Foption%3Dcom_content%26view%3Darticle%26id%3D13%26Itemid%3D25

Do you think, there is a way to fix it?

Thanks a lot and best regards,
cruisi

Hello,

If you want to avoid these errors, set "Assets loading method" parameter in module settings to "Joomla! API".

Regards,
ARI Soft

Hello ARI-Team,

wow, thanks for your great support. It works great.

Best regards,
cruisi
