
Menu Separators not showing - SOLVED

Posted by renno - 2010/11/11 07:05

I have two menu items set as separators, which are not showing. In fact they are not even being processed, so not a css issue.

There should be two further separator items on the menu at the top right entitled "Captains 2011..."

Thanks.

Hello,

You have provided bad link. Correct it please.

Regards,
ARI Soft

The module doesn't show separator menu items if it doesn't contain sub-menu items.
