"ARI Quiz Lite" is not menu extension. What extension you mean "ARI Ext Menu" or "ARI YUI Menu"?

ARI EXT MENU MODULE- this is the menu , how can i style it <http://www.katching.co.il/>-- this is the site.
my menu in css styled differently it means that i cant changed ?
i downloaded in joomla and the template whas made in dream weaver

The module CSS file is located by the following path:

/modules/mod_ariextmenu/mod_ariextmenu/js/css/menu.min.css

You can modify it for your needs.
