
Sub Menu Items not showing

Posted by Max - 2010/11/11 23:40

Hi,

I'm sorry, you get this question a lot, but all the posts I've checked didn't solve my problem. No matter what I do the sub menu doesn't show, there are arrows to indicate that there is a menu, but that's it.

url: <http://www.bosscovers.com/index.php>

Any help would be appreciated.

Cheers,

Max

Hello,

Add the following CSS rules:

```
.art-blockcontent-body .ux-menu-container ul li
{
    overflow: visible;
    padding: 0;
}
```

Hi again,

Thanks for the help, now the sub menus are showing, but I have another problem. Now the sub menus are behind the box below.

I tried some of the other solutions on the forum for this, but couldn't make any of them work.

Click to see the problem

I would really appreciate your help with this.

Cheers,

Max

Hello,

This problem with site template styles. It can be fixed if your site template supports module prefix.
