Styling Sub menu

Posted by Bossman45 - 2010/11/13 00:25

_____

I thought I'd throw this one back out here. I've read through a few similar posts but have not found an answer.

I am simply trying to sty my submenus. I've tried manipulating this selector with no success.

```
.ux-menu ul.ux-menu-hidden{
font-size: 1px;
display:none;
}
```

There is a bit of css that is being generated by the parameters. In theses parameters is font size. I would like to be able to manipulate all the parameters of the submenu from css. Any thoughts?

Loving the product so far. Save me so much time.
