Last Resort!

Posted by hakkuo23 - 2010/11/14 19:10
_____

Alright I am completely oblivious to the configuration of the menu, so since I cannot find working answers in the forum I need help with this.
Here is the link to the menu:
The Website
While looking through the forum, you say to edit the CSS but which one do I edit? Do I just copypasta into the 'CSS Styles' entry in the EXT MENU module edit screen?
The submenu appears behind the content, how do I fix that?
How can I make this menu look more like the one above?
And that is about it :D
Sorry if the questions have already been answered or are completely nubbish. I simply cannot find any working answer or I am not doing it right.
Thanks!

Hello,

Add the following CSS rules that sub-menu is shown correctly:

.art-Sheet-body .art-Block
{
  z-index: 3;
}

.art-Sheet-body .art-contentLayout
{
  z-index: 2;
}

You can add this code to "CSS Styles" parameter or to site template CSS file.

Regards,
ARI Soft

Alright that worked great! Now, how do I center the menu, and how can i copy the menu CSS from topmenu to the ariextmenu so it looks exactly the same?
Thanks

_____

It seems you have changed menu styles. Use the following CSS rules that centering the menu:

.ux-menu-container
{
  text-align: center;

```
}

.ux-menu
{
  display: inline-block;
  *zoom: 1;
  *display: inline;
}
```

Regards,
ARI Soft
