
How to move down horizontal menu 1st item

Posted by btm - 2010/11/18 13:06

Hello,

first of all, great module, thanks!

I have a horizontal menu but the first item is slightly higher (2px?) than the rest of the items, can you advise on how to make them all the same level?

<http://www.catalystpt.co.uk/index.php/example-pages-and-menu-links>
(see the horizontal menu midway through the content - NOT the main menu)

thanks for any help you can give.

Tom

Hello,

Add the following CSS rule:

```
.ux-menu-container ul li:first-child
{
    border-top: 1px solid #F1F1F1
}
```

Regards,
ARI Soft
