
Menu covers drop down menu above it. Setting zinde

Posted by dalearyous - 2010/11/19 19:08

the menu seems to be covering the drop down menu above it (main site menu). i tried setting the z-index to a negative value and it still overlaps the other menu...thoughts? i have attached a picture to show. <http://www.ari-soft.com/images/fbfiles/images/overlap.png>

Add the following CSS rules:

```
body #s5_menu_search_wrap
{
  z-index: 2;
}
```

```
body .s5_wrap_outer
{
  position: relative;
  z-index: 1;
}
```

ah thanks!

i missed the _wrap_outer

awesome.
