
Trouble witj Ari Ext Menu in IE7

Posted by roelfina - 2010/11/23 11:33

On my website: <http://www.nbvp.nl>
the Ari Ext Menu only shows in IE8, Friefox, Chrome, etc. In IE7 the complete menu disappears. Can anyone help me with this problem?

Hello,

This problem with site template styles. Add the following CSS rules:

```
#header .clear
{
  *clear: none;
}
body #menu A
{
  *padding: 3px 0;
  *height: 19px;
  *line-height: 19px;
}
```

Regards,
ARI Soft
