
Another Behind module the second

Posted by timi11 - 2010/11/24 16:09

Hey, I`m so sorry for that.

I must make a side for a friend and the same Problem.

The Menu is behind the contend and the Modules.

e.g. I have bye your ari Scroller and this is very cool and funky.

sorry and Thanks for your support...

See it here

Edit: and can i change the hight of the Menubuttons also?

Thanks

Hello,

Add the following CSS rules:

```
.art-content-layout .art-sidebar1,
.art-content-layout .art-content
{
    position: relative;
}
```

Use the next CSS rule that change menu items height:

```
.art-content-layout .art-sidebar1 .ux-menu-container LI A
{
    height: 30px;
    line-height: 30px;
}
```

Regards,
ARI Soft
