
ie6 padding

Posted by elina - 2010/11/28 13:58

Hello,

after searching the forum i have made changes in module's css and the menu looks pretty much like i want. But i am facing some problems:

1. The menu is really messed up with IE6. The padding of menu-arrow doesn't work and also the template's headerbar_bg.png image has disappeared.

<http://www.ari-soft.com/images/fbfiles/images/webmenu.jpg>

2. When i am visiting website's pages for the first time, the menu for some seconds keeps its native format without the styles,padding,colors etc that are configured.

What is causing this issue? Do i have to make the changes to the original .css files? url electricenergy .gr

thanks for this great module! :cheer:

```
#menu1 .ux-menu-container
{
    margin-top: 6px;
    left: 150px;
}
```

```
#menu1 .ux-menu-container .ux-menu A
{
    line-height: 78px;
    color: #7F8384;
    background: none;
    border: 0px none;
}
```

```
#menu1 .ux-menu-container .ux-menu A:hover
{
    color: #3990BD;
}
```

```
#menu1 .ux-menu-container .ux-menu .ux-menu-sub a
{
    background: url("images/menu_level2_item.png") repeat scroll 0 0 #F3F4F5;
    border: 1px solid #eee;
}
```

```
#menu1 .ux-menu-container .ux-menu .ux-menu-sub a:hover
{background:aliceblue;color:#3990BD;font-size:14px !important;}
```

```
#menu1 .ux-menu-container .ux-menu-sub LI A
{
    line-height: 17px;
    width: 155px;
    left: 15px;
}
```

```
#menu1 .ux-menu LI.ux-menu-item-main
{
    padding-right: 10px; /* space between main menu items */
}
```

```
#menu1 .ux-menu-sub li a {color:#6C6C6C;font-size:14px !important;text-align:left !important;border-right:1px solid #eee !important;border-left:1px solid #eee !important;padding:7px !important;}
```

```
#menu1 .ux-menu-sub li a:hover {background:#eee;color:#505050;font-size:14px !important;}
```

```
#menu1 .ux-menu-sub .ux-menu-link-last a {border-bottom:1px solid #C5C5C5 !important;}
```

```
#menu1 .ux-menu SPAN.ux-menu-arrow  
{  
  margin-top: 30px;  
  right: 5px;  
}
```

```
#menu1 .ux-menu .ux-menu-sub SPAN.ux-menu-arrow  
{  
  margin-top: 0px;  
  right: 10px;  
}
```

Hello,

Provide link to page please where we can see the module that we can investigate the issues.

Regards,
ARI Soft

Add the following CSS rules:

```
#headerbar  
{  
  *position: relative;  
}
```

```
#menu1 .ux-menu span.ux-menu-arrow  
{  
  *margin-top: 0;  
}
```

Hello,

i appreciate your help.

The code #headerbar{ *position: relative;} fix the issue about template's headerbar_bg.png and now is showing on IE6.

The problem now with this code is that the submenu goes behind text on IE6.

<http://www.ari-soft.com/images/fbfiles/images/webmenubar.jpg>

About the position of menu-arrow.

If the setting is *margin-top: 0; the menu arrow shows in right place on IE6 but in firefox and chrome it takes top position. I tried put the code in menu.ie.css but with no luck..

thanks for your time

"*margin-top: 0" uses star-html hack for IE and it does not affect other browsers. Regarding new problem, we suppose this problem with site template styles and you can investigate it with help IEDevToolbar add-on for IE.
