
menu and submenu are behind a content

Posted by mirko - 2010/11/30 19:01

So here's the problem (detailed at the attachment:

<http://www.ari-soft.com/images/fbfiles/images/Menu2.jpg> and

<http://www.ari-soft.com/images/fbfiles/files/template-bdc2056b1218438ef9975386bf5330c3.txt>

the menu can't open because is not in front of the construct.

See more here..

I use this Code for ARI Ext Menu

Code:

```
.ux-menu-container .ux-menu A,  
.ux-menu-container .ux-menu-sub LI A,  
.ux-menu-container LI A.ux-menu-link-first  
{  
border-right-style: none;  
border-left-style: none;  
border-top-style: none ;  
border-bottom-style: none;  
}  
.ux-menu-container .ux-menu a{  
background: transparent;  
color: yellow;  
}  
.ux-menu-container .ux-menu a:hover  
{  
color:#e14615;  
}
```

I read different post in the forum, but didn't find a way to bring up the menu in the front of the structure

Any idea?

Thanks a lot...

Hello,

Use the following CSS rule:

```
#navigation div.moduletable  
{  
overflow: visible;  
}
```

Regards,
ARI Soft
