Extra padding on dropdown menu in IE
Posted by qpidity - 2010/12/03 13:54

_____

Hi,

In IE we are seeing extra spacing between the parent item and the start of the dropdown items. This to my mind is the start of div.bd ul......but targeting this with a no padding or margin css rule doesn't make any difference. Can someone please help ? You can see the issue here

Thanks in advance

_____

Add the following CSS rule:

body DIV#navlinks UL
{
 display: block;
}

Regards,
ARI Soft
