
IE6 Horz menu issue

Posted by crosswire - 2010/12/03 15:03

My horizontal top menu in IE6 is moving to left of the top bar and squishing. Not sure why. Other browsers it looks fine which is right aligned.
please see attached files. <http://www.ari-soft.com/images/fbfiles/images/ie6topmenu.jpg>

Hello,

Provide link to page where we can see this problem.

Regards,
ARI Soft

<http://www.odlc.utoronto.ca>

it looks fine in other browsers from adobe browserlab tests except ie6 shifts the entire top menu to left.

Hello,

Unfortunately the site is unavailable, it requires credentials. BTW, you can use IEDevToolbar addon for IE browser that find reason of the problem. This problem with HTML layout and styles of site template in module position where you try to use the module.
