SUB MENU HIDES IN IE 7

Posted by veggito - 2010/12/09 11:13

_____

Hi,

My website is located at * LINK REMOVED *

I cannot get the submenu to work and it hides behind the content. I would really appreciate if you could tell me the solution to this problem.

Regards,

Vik

_____

Hello,

This is a problem with site template styles. We can recommend to use IEDevToolbar add-on for IE browser that investigate this issue or contact site template developers.

Regards,
ARI Soft

_____

Hi,

I can get the menu to display in front of the content, but the menu options are still unclickable. I tried using overflow : visible, but this shows the entire submenu in place of the menu.

_____

Problem is fixed. Just had to change the z-index of the content to -1.

Thanks, Great module
