
CSS question!

Posted by orangeSoda - 2010/12/10 16:08

I did some css configuration and it works great, only I can't seem to do two things.

1. One of the sub menus is less wider than the others.

and

2. On the drop down, every time I scroll on a sub menu the parent menu changes font color.

How do I fix this? Thanks in advance.

Hello,

Provide link to page where we can see the menu on your site that we can investigate these problems.

Use the following CSS rules:

```
.ux-menu-container .ux-menu .ux-menu-sub a.ux-menu-link-first
{
    width: auto;
}
```

```
.ux-menu-container UL.ux-menu LI a:hover,
.ux-menu-container UL.ux-menu LI a.ux-menu-link-hover
{
    color: #FFF;
}
```
