
Tertiary menu doesn't clear secondary menu

Posted by jgold723 - 2010/12/13 14:30

I have a horizontal menu with three levels. The tertiary level, which flies out to the right, isn't clearing the secondary menu -- it overlaps (and hides behind it). How can I fix that? See example below.

The development site is at <http://184.154.90.58/~wolfesne>

Thanks,

John <http://www.ari-soft.com/images/fbfiles/images/menuexample.png>

Hello,

Add the following CSS rule:

```
.ux-menu-container .ux-menu ul a
{
  width: auto;
}
```

Regards,
