## Menu moves in IE when click on other link

Posted by lorum - 2010/12/13 16:15

---

In IE, the main menu moves to the left when clicking on other link. Firefox is OK.

Here the link from my site :

<http://www.genevagate.ch/cpc/fr/home.html>

I appreciate any suggestion.

Hello,

This problem with site template styles. You can try to add the following CSS rules:

```
body #menu_footer .moduletable,  
body #mainMenu .moduletable  
{  
    float: right;  
    text-align: right;  
}
```

Regards,

Really thank you ! :)

It works perfectly.

Best regards
