
Problems with IE7 - Scroller problem

Posted by maorlast - 2010/12/15 12:13

When I use your module, in IE7, I see that the whole screen can be scrolled to the left and loses its proportion. This is not happening in IE8, or FireFox.

This is not "ARI YUI Menu" problem, this problem with slider module under the menu. You can verify it if temporary disable slider module or temporary disable menu module and you will the problem still exists.

Regards,
ARI Soft
