
Styling top-level menu items - no link class

Posted by jgold723 - 2010/12/15 16:24

In my horizontal menu, I have two menu items in which the `tag` is not given a specified class:

Sponsors

Camping

Because of this, I'm having trouble changing the color of the links, although this only seems to be a problem in Firefox. The links for "Sponsors" and "Camping" should be white -- not orange.

I've changed all color designations in the css file to white -- but without luck.

What rule do I need to add to make the links white (in all instances - link, hover, current and visited)? <http://www.ari-soft.com/images/fbfiles/images/menu-f59d1678c08634dd5f18425146deb79d.png>

You can use the following CSS rules:

```
#nav A,  
#nav A:visited,  
#nav A:link,  
#nav A:hover  
{  
    color: #FFF;  
}
```
