
Submenu drops down on the very left

Posted by eevaa - 2010/12/17 09:36

Hey everyone!

I was so glad when I found the Ari Ext Menu Module, it was exactly what I needed. Now there's one issue that needs to be fixed.

Whenever I hover above one of the top-level items of the menu, the dropdown list shows up on the very left of the menu instead of below the item. However, the moment I touch the item's border the dropdown list jumps to where it should be, but only for a second. Any ideas what I could do?

Many thanks in advance! :cheer:

Hello,

Provide link to page where we can see this problem that we can investigate it and try to help.

Regards,
ARI Soft
