Menu behind the Pictures

Posted by Ralf - 2010/12/28 23:44

_____

Hello
A question that seems to have been asked a hundred times, but the solution always seems to be different, and I can't find one to solve my problem.

Site is at (edit)

The submenus on the vertical submenu are all there, but are behind the content. Have tried changing just about everything that has been suggested.

Many thanks!

_____

Hello,

Use the following CSS rules:

body .tail-row-logo,
body .tail-row-logo .clear
{
 overflow: visible;
}

Regards,
ARI Soft
