
Line breaks in submenu items

Posted by Witchhunter - 2010/12/29 22:29

Hi,

I'm having a weird issue with ARI Ext Menu component. Sometimes menu shows OK, without line breaks (the picture on the bottom). However, hit refresh several times (totally random) and the line breaks will occur in all submenu items that have two or more words in it.

What can I do to fix it? Thanks!

You can find the website here (user: arisoft, password: arisoft). http://www.arisoft.com/images/fbfiles/images/Untitled_2.png

PS. I'm using Firefox, haven't tried in other browsers.

Hello,

Try to use the following CSS rule:

```
#pillmenu .ux-menu li a
{
  white-space: nowrap;
}
```

Regards,
ARI Soft

It appears the breaks are now gone, gone, gone...

Thank you very much for a quick answer!
