
Shadow on vertical menu

Posted by marver - 2011/01/04 09:03

Is it possible to apply a shadow on Ari ext menu? I use the vertical menu, don't know if that matters.

Hello,

You can use the following CSS rules:

```
.ux-menu-container,  
.ux-menu-sub  
{  
-moz-box-shadow: 2px 2px 2px gray;  
-webkit-box-shadow: 2px 2px 2px gray;  
-o-box-shadow: 2px 2px 2px gray;  
box-shadow: 2px 2px 2px gray;  
}
```

It will be worked in browsers which support CSS 3.

Regards,
ARI Soft

I removed: .ux-menu-container
so that only my colpane menu shows shadow.

Now I only want to make the color of the letter different than its parant.

Maybe you can help me out on this as well?

Thanks again for a good working menu and the great support!

Use the following CSS rule:

```
.ux-menu .ux-menu-sub A  
{  
color: red;  
}
```

That's it!

Thanks again.
