Anywhere or anyone to find documentaion?

Posted by JulioG - 2011/01/05 03:52

_____

Hello, I just recently installed this menu module but am having some difficulty when it comes to the configuring aspects of it. I could not find anywhere to get a possible walk through or guide of sorts as to how to go about the configuration process of the module.

Is there anyone or anywhere that I can go to possibly get information pertaining to this subject?

_____

Hello,

The module works as standard Joomla! menu module. How to use a menu module you can read here. Description of each module parameter appear when mouse over through parameter name on module settings page.

Regards,
ARI Soft

I'll Just go ahead adn post the result taht was achieved so that perhaps I could get a hand here.

Upon creating a new menu item / module to try and work with this extension this was the result http://onewebmedia.net/domains.html it is very clear that I have done something very wrong and honestly am not entirely sure what fouled up during the process.

Perhaps that can help to leading me in the proper direction to get this menu functioning as a proper drop down menu? or will more specifics need to be given?

_____

If you want to use "ARI Ext Menu" in current top menu position do the following:

1. Open module settings page and set "user3" value in "Position" drop-down.

2. Set "Enabled" property to "Yes".

3. Choose menu what you want to load with helps the module in "Menu name" drop-down.

4. Configure other module parameters if necessary.

5. Save module settings. That's all.

Regards,
ARI Soft
