
Problems in IE

Posted by marver - 2011/01/06 19:01

Created my menu exactly the way I wanted. So I'm happy.

But.... I did my checks in Firefox and I just found out that IE is no good. Should have checked earlier, but you know how it goes....

Is there any 'simple' solution for this.

Here is the example:

<http://voorbeeld.pixelwebdesign.nl/www.vanderzeeassistance.nl/>

Works fine in Firefox, but again.. not in IE.

I hope someone can help me out.

Hello,

Add the following CSS rules:

```
DIV#menu
```

```
{  
  z-index: 10;  
}
```

```
DIV.ux-menu
```

```
{  
  background-color: transparent;  
}
```

Regards,

ARI Soft

That's better, thx. Now the bgcolor of the links should be the same as the active state button. I hope you can help me out on this one as well.

The second rule which provided in the previous post should help. Where you place our code?

in menu.min.css
at the bottom

Sorry, use the next CSS rule:

```
UL.ux-menu
{
    background-color: transparent;
}
```

instead of:

```
DIV.ux-menu
{
    background-color: transparent;
}
```

Regards,
ARI Soft

Thats's it!

Thanks a lot!
