
css position

Posted by foodgy - 2011/01/12 23:30

YSlow says that

There is 1 stylesheet found in the body of the document

www.mysite.com/modules/mod_ariextmenu/mod_ariextmenu/js/css/menu.min.css

Why so? is there any way to load css in the head of page?

Hello,

Set "Assets loading method" parameter to "Joomla! API".

Regards,
ARI Soft
