
Different color

Posted by CarlCeder - 2010/01/13 08:36

I can't tell from the CSS file...but is there a way to change the color? Or do I need to modify a jpg (or png)? I really like the menu by the way

=====

Hello,

ARI Ext Menu is under GPL license and it's open source, you can change CSS files of the module for your needs.

Regards,
ARI Soft
