## Opening wrong page when visiting again

Posted by johnknit - 2013/06/20 16:05

---

I have made a horizontal menu.

One of the items are with sub menu wich must open a Virtuemart category.

When click on the sub menu the first time the wright category opens.

when i cliked from that opend category on another menu item it opens the correct page.

when clicing on another submenu item after that

the "all categories" default page of virtuemart opens and not the category

as set in the menu settings.

what cause that behaviour?

I use Joomla 2.5.11 and Virtuemart 2.0.20b

Hello,

Where we can see the problem?

Regards,

The site is still under construction on localhost.

Please let me know what you want to see.

Perhaps i can make some screenshots?
