Style/css chooser in backend.

Posted by Tweak91 - 2013/07/25 19:18

_____

Hallo,

It would be cool te have an option to choose out different styles for the menu? So ohters can make also creaction and share them so others can use the design also.

So lets se there are 3 designs en they can choose what style they like for their website in the backend of joomla.

I will and can pay or do some small donation for this.

Thanks,
Tweak91
