config START and END level

Posted by apsites - 2010/07/22 14:22
_____

The standard Joomla Main Menu module has options to specify Start Level and End Level.

Can this feature be added to ARI Ext Menu (and also to ARI YUI Menu).

It would make these modules even more powerful .

Thanks,
Andre

Hello,

Thanks. It's a good idea. We'll implement this feature within 1 week.

Regards,
ARI Soft

Sorry, but we need some clarification of your suggestion. If start level greater than 0, what menu node should be used as start point. For example if menu have the following structure:

- MENU ITEM 1
--- SUB MENU ITEM 1
--- SUB MENU ITEM 2
------ SUB SUB MENU ITEM 1
------ SUB SUB MENU ITEM 2
--- SUB MENU ITEM 3
------ SUB SUB MENU ITEM 3
- MENU ITEM 2
--- SUB MENU ITEM 4
--- SUB MENU ITEM 5
------ SUB SUB MENU ITEM 4
- MENU ITEM 3
--- SUB MENU ITEM 6

And start level is set to '1' or '2', what menu items should be selected?

Regards,
ARI Soft

I have tested with the standard Joomla module and here is the result:
level 0 = your MENU ITEM
level 1 = your SUB MENU ITEM x
level 2 = your SUB SUB MENU ITEM x

If you config:
start = 1, end = 2
Joomla will render as follows:
level 0 NO
level 1 YES
level 2 NO
level 3 NO, etc

If you config:
start = 1, end = 3
Joomla will render as follows:
level 0 NO
level 1 YES
level 2 YES
level 3 NO, etc

In a PM I have sent you logon details for a standard Joomla site where you can test yourself.

Thanks for the explanation, if we correctly understand, all menu items from specific level(s) should be shown.

Regards,
ARI Soft

_____

Hello,

We have updated 'ARI YUI Menu' and 'ARI Ext Menu'. New version supports new parameters 'Start Level' and 'End Level'.

Regards,
ARI Soft

Thanks for new version.

I a new thread I will now ask to add 'Always show submenu's YES/NO'.
Now I see I should have done that at the start of this requirement.

The combination of these two will allow us to implement beautiful multi-position menus.
