
Joomla 4 and PHP 8

Posted by MiBa - 2022/04/20 07:47

I wish You will make Ari Ext Menu compatible with Joomla 4 and PHP 8, because we use this menu a lot at our site kgv-calw.de. Have You planed this? This will save us much work in conversion to another module. We will be happy,, even when You relese a paid version.

Greetings
Michael
