## Multiple answers per question

Posted by Jordan - 2011/05/12 07:10

---

Hi.

love the product. Very useful.

I'd like to know how to create a question that will allow multiple answers.

The default setting of the radio buttons only allow me to select one answer per question.

Thanks in advance for the assistance.

Hello,

Open question settings page and set "Question type" parameter to "Multiple Question":

Awesome.

Thanks for the quick response.
