# Deleting single entries from the results

Posted by Jordan - 2011/05/12 12:19

_____

Is there a way to delete a single entry from the results table?
I found a thread describing the way to empty out the sql table, but that clears out everything.

Cheers!

_____

Hello,

You can use the next SQL query:

```
DELETE FROM
  jos_ariquizstatistics,
  jos_ariquizstatisticsinfo
USING
  jos_ariquizstatisticsinfo LEFT JOIN jos_ariquizstatistics
    ON jos_ariquizstatisticsinfo.StatisticsInfoId = jos_ariquizstatistics.StatisticsInfoId
WHERE
  jos_ariquizstatisticsinfo.StatisticsInfoId = STATISTICS_INFO_ID
```

Where STATISTICS_INFO_ID is ID of necessary results. For example if ID equals to 3, use the next query:

```
DELETE FROM
  jos_ariquizstatistics,
  jos_ariquizstatisticsinfo
USING
  jos_ariquizstatisticsinfo LEFT JOIN jos_ariquizstatistics
    ON jos_ariquizstatisticsinfo.StatisticsInfoId = jos_ariquizstatistics.StatisticsInfoId
WHERE
  jos_ariquizstatisticsinfo.StatisticsInfoId = 3
```

Regards,
ARI Soft
