
Selecting \"Display# All\" returns zero results

Posted by Jordan - 2011/05/13 12:25

Hi.

If I try to select Display# All, it doesn't return any record, but if I select Display# 100, it'll show me 100 records.
How do I proceed to correct this error?

Cheers!

//edit: I think it may be because I have 51 entries in jos_arquizstatisticsinfo, whereas i have 816 entries in jos_arquizstatistics. Could this be the reason?

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate the problem?

PS: It is normal that these two tables contains different number of records.

Regards,
ARI Soft

As much as I'd like to, I can't.
The site is hosted on an Intranet system, with no outside access. :(

In this case you can upload your site to an online server or create backup with help Akeeba Backup extension and send it to us by email that we can investigate the problem.
