
XML Parsing Error at 1:14. Error 73: > required

Posted by mitkobg - 2011/06/24 08:28

Hi,

i have installed AriQuizLite 1.1.3 on my Joomla 1.5.23

and when i try to add new quiz it displays this error:
XML Parsing Error at 1:14. Error 73: > required

when i try to add new Question category or question or Quiz category it does not display error but not add anything, it stays with open submit form instead and the URI in browser address bar changes to index.php#.

What to do?

Hello,

Could you provide temporary access to your J! backend by email that we can investigate the problem?

Regards,
ARI Soft

I get the same message - and also:
XML Parsing Error at 1:15. Error 57: XML declaration not finished

Hello,

Try to temporarily switch off WYSIWYG editor.

That help with the error 73, but not the error 57.
AND the error 73 returns when i turn the editor back on.
:({

It seems this conflict with 3rd party extension. We can investigate it if you provide temporary access to your J! backend by email.

Errors are generated by JCE editor and "Editor Button - Modules Anywhere" plugin.
