Error when trying to create new Quiz

Posted by kanute - 2011/09/16 15:59

_____

I am about to try the "demo" of ARI Quiz, the lite version, as this might look like the one we are looking into integrating with our system, but when we are testing the lite version,
we cant even get started as when clicking add quiz, we get the following error msg:

Fatal error: Call to a member function attributes() on a non-object in
/home/xxxxxxx/public_html/uk/administrator/components/com_jce/helpers/xml.php on line 44

The site we are about to use it on is running with joomla 1.5.17, are there any known incompatabilities with this component with this joomla version.

_____

Hello,

We can investigate the problem if you provide temporary access to your J! backend by email.

Regards,
ARI Soft

_____

I am having this exact same problem, even after un-installing and re-installing the component. Is there a fix? I'm using JCE 2.0.19 and Joomla 1.5.25

Thanks
Eric

_____

Try to temporary disable WYSIWYG editor in user settings.

Regards,
ARI Soft
