
Questions

Hi,
I have downloaded Ari Quiz Lite and have created a series of questions. The Quiz shows up ok but when I answer a question and save it, it returns to the same question rather than go to the next question. Any ideas what I might be doing wrong. If I log out and log in again and got to the Quiz again, it moves to the second question and so on until I reach the end. All very strange.

Hello,

Could you provide temporary access to your J! backend by email so we could investigate the issue?
