How to make a quizz with several questions ?

Posted by isawell - 2011/11/21 16:06

_____

Sorry if the answer is already available somewhere... I didn't find the information :blush:

I want to create a quizz on my website http://www.spitz-loup.com
So I created a quizz
I added 10 questions
In the "Main Settings" of the quizz, I indicated
"Question Count : 10"

But... Only 1 question appears in the front end :blink:

What is the good way to create a quizz with more than 1 question ?

_____

Hello,

The extension shows one question at a time.

Regards,
ARI Soft

_____

1 question at a time ok but I'd like to make a quizz with several questions before getting the result.

For the moment, the quizz asks me for one question (random in the 10 I gave) and then, shows me the result of the quizz...

_____

Could you provide temporary access to your J! backend by email so we can investigate the issue?

Regards,
ARI Soft
