
How can i create question and result?

Posted by zafergur - 2011/12/20 09:43

Dear,

I created questions but i cant create options results.

Example $5 + 5 = ?$

a)9
b)10

i cant create option a and b. How can i create option a and b?

and i cant see the continue button.

Hello,

Where we can see a problem?

Regards,
ARI Soft

It seems quiz doesn't contain questions. We can investigate this issue in more details if you provide temporary access to your J! backend by email.

Regards,
ARI Soft

The quiz doesn't contain questions. Add question(s):
