---

I want to correct: "Percentage: 85.00%" to "Percentage: 85%"  
and add "Score: 8.5", then how?

Hello,

Use {`$UserScore`} predefined variable in a text template to show data in points. If you want to change format of percent value, see "getFinishedResult" method in  
`\administrator\components\com_ariquizlite\kernel\Controlllers\class.ResultController.php` file.

Regards,  
ARI Soft
