
media embedded quiz

Posted by YosF - 2009/09/23 03:41

I am now creating forced A or B choice quizzes without correct answers for survey. I need to embed video and/or audio file to be embedded in each quiz. Does anybody know the audioplayer that can be embedded in a quiz produced with ARI Quiz Lite? I tried 1pixelout but it does not seem it works with ARI Quiz Lite. Is it a matter of a browser? Thank you very much.

Hello,

ARI Quiz Lite doesn't support this ability, but ARI Quiz Lite is open source and under GNU GPL license and you can modify it for your needs or you can use ARI Quiz which supports possibility for using video and audio in questions.

Hello,

If you mean ARI Quiz, it supports possibility for adding audio and video to questions with help AllVideos plugin. You can read about this on ARI Quiz page on F.A.Q. tab.
