## wrong set of questions

Posted by JeanMarcG - 2009/10/02 18:26

---

Hi,

I have two quizzes, each with its set of questions. on the frontend I always got the same set of questions whatever the quiz I choose.

do you have a clue about what i'm doing wrong ?

thanks for your response

Jean Marc

Hello,

Have you set 'Random Question' option on quiz settings page? Have you completed previous quiz after set this option?

1) "Random question" option is not set

2) In fact in a first time i always got the first set of question (whatever the quiz I choose) and then, when I completed the first quiz, I always got the second set of questions whatever the quiz I choose

regards

JeanMarc

If 'Random Questions' option isn't set, quiz will display questions in the same way every time.

sorry, may be my english is to bad, and i'm not accurate enough :

I have 2 quizzes and what I want is when I choose on the frontend one quiz, ARI Quiz plays the set of question of this quiz.

What happens is, whatever the quiz I choose, ARI Quiz plays the questions of the first quiz. This happens until I completed the quiz.

---

After that, Ari quizz plays the second set of question whatever the quizz I choose
