If I go to the ari quiz lite backend I see this error when going to About  
XML Parsing Error at 1:15. Error 57: XML declaration not finished  
Any ideas?  
If you need backend access, let me know, and I'll set up a temporary access...

Hello,

It can be a problem with a WYSIWYG editor. Try to disable it.

I only have the TinyMCE editor activated, is that the one I should try and disable?

We can investigate an issue if you provide a temporary access to your J! backend by email.

Great, seems to work perfectly, was it a config or a code problem?
