
Display time in min:sec format on AriQuiz LITE

Posted by vcube04 - 2012/05/31 05:05

Hi:

I've downloaded, installed and got AriQuiz LITE working just fine (thank you). But the only issue is the "Time Remaining" shows up in seconds. Anyway we can convert this into HH:MM:SS format?

Please guide me as to how to fix it in AriQuiz-Lite module.

Thanks

=====

Hello,

It requires to modify the extension. "ARI Quiz" shows time in "HH:MM:SS" format.

Hi:

Could you please elaborate? What are the files? What is the code? What is the steps?

Thanks

This feature is supported by "ARI Quiz". You can see it here.

It requires modification of "ARI Quiz Lite", but modification of the extension is out of free support.
