User Results

Posted by robio - 2012/07/24 04:57

_____

hi

i try to create a CSV file which contains all quiz details including useranswer and correct answers by acessing the database of ari quiz lite.
 under d2u5l_ariquizstatistics table i found results are soted in "Data" column.but it in some xml format.

so can any one tell my how to convert that xml format to readable text format
 :(

_____

Hello,

You can find how to work with XML data in PHP files from \administrator\components\com_ariquizlite\kernel\Entity_QuestionEntity folder.

Regards,
ARI Soft

_____

Each answer have unique ID, 4fdeb1da12d7b5.16276727 is ID of the answer.

Regards,
ARI Soft

_____

#__ariquizstatistics table contains user answers, questions answers are stored in #__ariquizquestionversion table in "Data" column.

Regards,
ARI Soft
